

IMPLEMENTING A 1:1 INITIATIVE?

Choose a tech partner
that's done their homework.

Having implemented and managed one of the largest state mandates in the country, you can feel confident that RTI has the resources you need to execute a successful 1:1 initiative. Rely on us for:

Hardware Solutions

- Be assured of receiving quality products at competitive prices. As an HP Elite Partner, we are one of the leading HP Public Sector Partners and resellers and one of the fastest-growing HP Partners
- Select the best systems for your students and give them several options from which to choose—we'll help you navigate all the choices
- Offer your students an online shopping option with a customized, branded website specifically for your school. We'll create the site and manage the sales for a complete, turnkey solution
- Minimize paperwork by providing one Purchase Order for your complete solution; RTI's part numbers are interchangeable with HP's

Customization

- Offer students, faculty and staff personalized flash drives to make transferring data a snap
- Protect your investment and show school pride at the same time by embroidering your school's logo on the front of a G'rilla™ branded backpack or carrying case

- Show school spirit and deter theft with your school logo laser engraved on notebook lids

Integration

- Ensure your students have the right software loaded prior to the first day of class with hard drive imaging
- Track and protect all of your units with asset labeling and detailed inventory reporting

Deployment

- Warehouse all your units in our environmentally controlled facility until you're ready to take delivery

Financing

- Take advantage of finance options such as leasing, which can provide the flexibility school districts need to reduce budget constraints

Looking for a truly interactive classroom?

As a leading SMART integrator, RTI is your expert resource. We will conduct a site level audit and recommend proper SMART Board installation and wireless network setup to make sure your new technology gets up and running properly.
